No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

This clone is available from RZPD;
contact RZPD (customer.service@rzpd.de) for further information.
This CDS clone is a part of a collection of human full ORF clones
generated by RZPD.
This CDS has been cloned incl. stopcodon.
The CDS has been cloned into pDONR201 via a BP Clonase(TM)
reaction. Additional sequence has been added in front of the start
codon: att. .AAAAAA GCA GGC (ATG).
After the stop codon 3' UTR sequence is present in front of the 3'
att site (ACCCAGCTTTCTT).
Compared to the reference sequence NM_144501 (gi21464106) we did
not find any amino acid exchanges.
